

It highlighted the sharp rise in the pumped storage hydropower segment. Turkey doesn't host any such energy storage facilities, but the country's additions of conventional capacity were the ...

The project, powered by Envision's proprietary off-grid renewable energy system, applies innovative energy storage and load flexibility. Surplus green power is stored in the form of ...

The plan also includes: 2.1 GW of solar PV capacity, with one 550 MW project nearing completion in a former lignite mine, 860 MW of energy storage, including pumped hydro and battery ...

A new 50 megawatt (MWp) solar photovoltaic plant will be constructed in Albania with 39.2 million euros in financing from the European Bank for Reconstruction and Development (EBRD) and ...

Solar became the EU's largest source of electricity for the first time in June 2025. National records for both photovoltaics and wind rolled in in May and June, pushing coal to an all-time low. ...

Record solar power production, backed by yet insufficient energy storage capacity, helped maintain the stability of the electricity system in Europe during the latest heatwave, Ember ...

Croatian oil and gas company INA and German energy giant E.ON's subsidiary in the Southeastern European country have signed a power purchase agreement for electricity from ...

MAVIR, the Hungarian electricity transmission system operator (TSO), put into operation a battery energy storage system, BESS, of 20 MW in capability and a three-hour cycle. It will help grid ...

“The EU remains firmly committed to supporting Albania's energy security and sustainability, while addressing climate change impacts and enhancing resilience.” The EBRD's sovereign loan of ...

The new Selanovtsi solar farm of 59.8 MW in peak capacity near Vratsa was installed alongside a battery energy storage system of 107.3 MWh in capacity. The hybrid energy park, owned by ...

Amid a battery investment frenzy in Romania, Nova Power & Gas is about to build a battery energy storage system that would double the current total capacity in the country. In addition, ...

The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an environmental impact assessment for the planned 99 MW solar ...

With the acquisition of ABO Energy Hellas, HELLENiQ Energy strengthened its project pipeline for

Albania energy storage policy

renewables and energy storage by a third, to 6 GW. Amid a consolidation in the renewables ...

The Exeron X-BESS factory will put Bulgaria on the world map for the production of battery energy storage technologies, the ministry said. It is fully aligned with the NZIA goals for secure and ...

Electrica targets 1 GW of installed renewable energy capacity by 2030 alongside the deployment of 900 MWh of energy storage The company's inaugural debt securities were priced at a yield ...

Without storage, flexibility and serious planning, the energy transition remains just an empty slogan, the renewable energy expert pointed out. Nevertheless, French giant TotalEnergies ...

Energy modernization projects in nine member states of the European Union will receive a total of EUR 3.66 billion from the Modernisation Fund, in the largest disbursement to date from the ...

The European Bank for Reconstruction and Development (EBRD) has approved a sovereign-guaranteed loan of up to EUR30 million (~\$35.1 million) for KESH, Albania's state-owned utility. KESH is responsible for generating around 65% ...

SolarPower Europe believes that the European Union needs ten times more battery storage by 2030 to support the growth of solar and other renewable energy capacities and maintain the ...

Albania energy storage policy
