

The International Renewable Energy Agency's latest report finds little change in the global average levelised cost of electricity for utility-scale solar plants year-on-year, while the global ...

What Is a 3-Phase Off-Grid Solar System and How Does It Work? A 3-phase off-grid solar system converts sunlight into three alternating current (AC) streams--an approach sometimes referred to as off grid solar--that balances ...

Intellihub is proud to announce a groundbreaking partnership with Bunnings to launch Zelora --a new solar and battery subscription service designed to make home electrification more ...

Solar energy is becoming an increasingly popular source of electricity in Australia. As of 2023, rooftop solar photovoltaic (PV) systems account for over 10% of Australia's electricity supply, ...

Australia has witnessed a remarkable surge in the adoption of rooftop solar, with over a third of all homes embracing this clean energy source. This trend is underpinned by several factors, ...

The European Investment Bank (EIB) has approved in-principle up to USD 135 million (EUR 116.1m) of senior debt finance for a 145-MW hydrogen-to-green-fertiliser project in Villeta, ...

Solar power is becoming an increasingly popular choice for Australians to begin generating renewable energy at home. Australia is also conveniently well-suited for solar energy thanks to its ample sunlight and wide ...

The study combined First Nations seasonal calendars with a novel deep learning model, an artificial intelligence technique, to predict future solar panel power output. Solar is one of the ...

A densely populated region in Asia, with very limited space for large solar parks or other large-scale renewable energy infrastructure, scarce natural resources, and heavy reliance on energy ...
