

Itaipu Binacional begins installation of its first floating solar plant on the Paraguayan side of the reservoir, with 2 solar panels and 1 MWp of power. The project brings innovation, scientific ...

Solar energy is sought after to produce clean, renewable energy to combat climate change and photovoltaics is the way to convert the sunlight to electricity. Thin film photovoltaics is a major ...

The Low-carbon and Smart-energy Innovation Park Solutions market is experiencing robust growth, driven by increasing global awareness of climate change and the urgent need for ...

This paper discusses the research status, performance analysis, key technology research, and development trends of PV/T components to fill the research gaps, promote the development of ...

New York, July 2 - A new study published today shows that coupling renewable energy targets with supportive development policies and investments would have major financial benefits. ...

Rooftop solar PV installations in China may surge in the next three years as the country goes through a green energy transition and plans to make renewable energy a key cornerstone in the country's path to a greener ...

Research areas suitable for publication in Renewables include those containing chemistry related to: o Electrochemical energy storage & batteries o CO2 recovery & ...

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

Asuncion solar energy research and development
