

China-headquartered Trinasolar is seeking development approval to build what would be the biggest solar farm in Western Australia, as well as one of the largest battery energy storage projects in the state to cater for an anticipated 1.8 GW ...

A densely populated region in Asia, with very limited space for large solar parks or other large-scale renewable energy infrastructure, scarce natural resources, and heavy reliance on energy ...

The Cheaper Home Batteries Program is helping more Australians save on energy bills and cut their emissions with cheap, renewable energy. From 1 July 2025, households and small ...

Solar power is becoming an increasingly popular choice for Australians to begin generating renewable energy at home. Australia is also conveniently well-suited for solar energy thanks to its ample sunlight and wide ...

Rooftop solar is extremely popular in Australia, with more than a third of all homes having solar panels installed on their roofs. In fact, Australia has three times more rooftop solar installations ...

Perth-based energy storage and off-grid power system specialist Magellan Power has launched a \$15 million funding round to boost its manufacturing capabilities and support a "significant ...

Intellihub is proud to announce a groundbreaking partnership with Bunnings to launch Zelora --a new solar and battery subscription service designed to make home electrification more ...

Solcast provides more detailed forecasts of power output and irradiance for large and small scale solar, for single sites or for grid aggregations, available for anywhere in the world via the Solcast API

Solar energy is becoming an increasingly popular source of electricity in Australia. As of 2023, rooftop solar photovoltaic (PV) systems account for over 10% of Australia's electricity supply, ...

Austrian solar technology firm Fronius has launched its new home battery system in Australia, completing its solar ecosystem. The Fronius Reserva offers seamless integration with existing ...

Australia is preparing to build the world's most powerful solar power plant. Engineers and builders will have to solve complex problems to cover an area equal to 17 thousand football fields...

Top 10 Solar Power Countries In The World: Solar energy is one of the cleanest and most powerful sources of renewable energy in the world. As concerns about climate change and pollution grow, many countries are turning to solar power ...

Australia solar power caracas

The International Renewable Energy Agency's latest report finds little change in the global average levelised cost of electricity for utility-scale solar plants year-on-year, while the global ...
