

Independent engineers in Germany have discovered the high-voltage battery on a Volkswagen ID.3 is lasting longer than expected after the VW hatch was found to have lost just 13km of range after travelling 160,000km over four years. ...

It delivers unmatched battery life that outclasses every competitor in its category. With multi-day battery life on a single charge, the Nord CE5 completely eliminates battery anxiety, allowing ...

To protect battery life during low workload periods, maintain partial charge (40-60% for Li-ion, 50-70% for Lead-Acid), store at 15°C-25°C, and avoid deep discharges. Use smart chargers ...

How Does GEOfinder Affect Battery Life? GEOfinder is a tool that allows users to locate a phone number by sending a tracking link. When the recipient clicks the link, their location is revealed ...

The Clean Energy Frontier is a series of deeply reported stories from reporters around the world shining a light on the supply chains which produce clean energy technologies, such as batteries, EVs, solar panels and wind ...

Soltech Energy, through its subsidiary Soltech Energy Solutions, has entered into an agreement with the energy company Nordic Solar regarding a large-scale battery project. The project ...

About Us Echandia Marine is a leading innovator in sustainable marine battery systems, providing cutting-edge technology to enable cleaner, more efficient marine transport. Our mission is to ...

The production of batteries for electric cars in Skellefteå; in northern Sweden has stopped for good. It was supposed to be Europe's answer to Chinese dominance in the battery industry.

Sweden is a world-leading country when it comes to green energy, with around 98 per cent fossil-free electricity production. More than 70 per cent of that comes from renewable sources, the rest from nuclear power. The ...
