

In the first half of 2025, Germany's onshore wind power sector experienced its most substantial growth since 2017, indicating a resurgence in the country's renewable energy efforts, ...

By harnessing wind power from CSSC's renewable energy and shared storage assets, the facility will produce green hydrogen through electrolysis. This hydrogen will then be synthesized with ...

As renewable energy uptake rises, it will be crucial to monitor high-growth areas of expansion, like offshore wind and distributed systems, full-cost factors of incorporation like storage and smarter grids, as well as the flexibility ...

Here are 10 African countries leading the way in electricity access, highlighting what sets them apart and drawing parallels to Nigeria's ongoing struggles: Egypt (100% Electricity Access) Egypt has achieved a remarkable 100% national ...

Located in the Northern Cape, this groundbreaking project is set to become Africa's largest standalone battery energy storage system. With a capacity of 153 MW, it will play a vital role in ...

The battery storage systems will provide essential grid services such as frequency response and voltage regulation, enhancing the efficiency and reliability of renewable energy integration. ...

India has reached a significant milestone in its transition to clean energy by achieving 50% of its installed electricity capacity from non-fossil fuel sources, surpassing its 2030 target under the ...

The Green Energy Revolution Africa holds some of the world's richest renewable energy potential. The Sahel sun, Horn of Africa wind corridors, and East Africa's geothermal fields offer a ...

Image: Plenitude. Plenitude, the renewable energy development arm of Italian oil and gas major Eni, has started operations at the northern block of its 330MW Renopool solar portfolio in Spain.

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, which is 30% owned by Norfund, in partnership with ...

This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis. There are several energy storage technologies available, broadly - ...

Cape verde renewable energy storage

This loan is designed to accelerate the transition, not to suddenly yank the plug. The plan is to gradually phase out coal while simultaneously scaling up renewable energy sources like solar ...

Cape verde renewable energy storage
