

The EU Market Outlook for Solar Power: 2025 Mid-Year analysis is the first of our reports of its kind. The publication provides a brief market snapshot and outlook for the rest of the year. As ...

Why can't solar energy solve Cuba's energy problems? While solar energy contributes to the grid, its current capacity is insufficient to offset the structural failures of Cuba's conventional power ...

Residents of Cuba should brace themselves for yet another day plagued by widespread blackouts, as alarming figures of power deficits underscore the severe energy collapse ...

In this article, you will learn how many rechargeable fans and power plants you can bring to Cuba according to Customs rules in 2025. What rechargeable fans and power stations can you take ...

At present, Cuba's solar capacity stands at approximately 280 MW. The new project is part of a broader initiative to expand the country's renewable energy infrastructure, aiming for 2.1 GW ...

"No es un costo, es una inversión": La apuesta de Tulip Power por la energía solar portátil en Cuba La firma espera convertirse en un actor relevante en la transición energética cubana. Hoy enfrentan los desafíos logísticos y la ...

Ciego de Ávila, Cuba, 21 jul (Prensa Latina) El parque solar fotovoltaico, ubicado en el polo agropecuario La Cuba, en la central provincia de Ciego de Ávila, entrega hoy energía al ...

Top International Tourist Arrivals to Cuba Canadian tourists continue to dominate visitor numbers, maintaining their status as the largest group. Since the beginning of 2025, 428,125 Canadians ...

The electricity generation deficit in Cuba is causing severe blackouts, with a maximum impact of 1,750 MW expected. Fuel shortages and failures at thermoelectric plants are worsening the ...

The Cuban government announced which will begin selling solar panels for homes, including installation, prioritizing hard-to-reach communities and vulnerable sectors. The measure seeks to alleviate the overload of the ...

The Cuban government has invested in solar energy as an alternative however, the existing solar parks have not resolved the crisis due to their insufficient capacity compared to the country's ...

The Cuban government considers solar parks to be a quick and viable solution to tackle the energy crisis, as their installation is quicker compared to the modernization of thermal power ...

The opportunity now for individuals to import their own photovoltaic systems to Cuba, may change this situation. With just 20,000 solar water heaters and a million kWh every day of energy installed in its photovoltaic parks, Cuba is ...

What is the scope of the Cuban solar project? The Cuban government's plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which ...

“Systems using renewable energy sources for home generation are being managed, and they will soon begin arriving in the country for sale to the population, including installation,” the minister ...

Cuba is facing an energy crisis with more blackouts and restrictions due to insufficient funds to pay for oil. The government is promoting solar parks, but they are inadequate in light of the ...

Solar power systems are mainly divided into three categories: grid-tied systems, off-grid solar systems and battery energy storage systems. Bluesun can provide One-stop solution for your solar power systems.

El Movimiento Estatal de Solidaridad con Cuba (MESOC), que agrupa a más de 60 colectivos en el Estado español, emitió un contundente comunicado con motivo del 72 aniversario del asalto a ...

Not even the sun reaches: Solar parks do not prevent a deficit of 1,600 MW this Sunday The UNE reported that, despite solar production, the electricity deficit in Cuba this Sunday will be 1,605 ...

The 22 new photovoltaic solar parks generated 2312 MWh during the previous day, with a peak capacity of 478 MW. Although these figures show progress in the integration of clean energy, ...

Ciego de Avila, Cuba, Jul 21 (Prensa Latina) The new Santiago Rojas photovoltaic solar park, located in the La Cuba agricultural hub of central Ciego de Avila province, began delivering ...

The UNE has not provided details on potential short-term solutions, leaving the population to endure several consecutive days of widespread disruptions. Key Questions on Cuba's Energy ...
