

The proposed U.S. tariffs could potentially double the material costs for domestic manufacturers. Battery anodes represent approximately 7 percent of an EV battery's total cost. Industry ...

Mitsubishi Motors is getting ready to launch its first mass-market electric vehicle (EV) in Australia, with local engineers already playing a key role in shaping how it drives on Australian roads. Set to arrive in the second half of 2026, the new ...

The average cost of living in Taiwan is \$1102, which is 1.04 times less expensive than the world's average. Compare cost of living by city. Taiwan ranked 79th out of 197 countries by cost of living and 33rd best country to live in.

The duty could raise temperatures in the global electric vehicle supply chain, potentially adding to costs for automakers who rely on the material for production. The products covered under the ...

GM's big bet on affordable EV batteries is here General Motors is significantly reducing electric vehicle prices by adopting lithium iron phosphate (LFP) battery technology, which has been ...

Taiwan's electric scooter market appears to be entering a new phase--one defined by a tripartite division of battery-swapping networks. But with limited space, dense urban populations, and ...

Taipei, July 7, 2025 - Federal Express Corporation (FedEx), one of the world's largest express transportation companies, has announced its collaboration with FUSO to introduce 12 fully ...

New vehicle sales in Taiwan shrank 14.4 percent year-on-year in the first half of this year, not boding well for the market to return to positive growth this year amid the uncertainty of US ...
