

The year 2024 was a milestone in the global energy transition. Renewable energy didn't just make gains, it shattered records and established itself as the undisputed economic powerhouse of ...

TSOC will install battery storage systems at three major substations: These 120MW of capacity and 400MWh of energy storage will serve as a stabilising force, helping the grid absorb...

Here are Spain's top 10 energy storage investors, who are shaping grid flexibility, energy security, and decarbonisation. These major investors are funding high-impact initiatives like lithium-ion ...

Cyprus has formally approved the creation of a national mechanism for the control of foreign direct investments (FDI), following a cabinet decision on Wednesday. The move aims to strengthen ...

Aed Energy has secured investment from Catalyst, the Masdar City-bp backed accelerator focused on scaling climate technologies across the Middle East and beyond. The investment ...

Ta tria nea erga aforoyrn monades apothikeysis energeias me mpataries (Battery Energy Storage Systems, BESS), oi opoies provlepetai na egkatastathoyrn stoys exis Ypostathmoys ...

The deal, its first investment in LDES tech, entails using Energy Dome's carbon dioxide battery for the grids that power Google's operations around the world. Batteries are used to keep excess ...

In a move set to transform the country's energy landscape, the Cyprus Energy Regulatory Authority (CERA) has greenlit the development of three state-owned battery storage projects. ...

the supply of critical inputs, including energy or raw materials, as well as food security; and in determining whether a foreign direct investment is likely to affect the national security or public ...

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, which is 30% owned by Norfund, in partnership with ...

The Netherlands' aim to a carbon-neutral economy by 2050 is making it a major energy storage player in Europe. Storage solutions are needed to maintain grid stability and flexibility as ...

Energy storage technologies are being prioritised in order to improve system resilience and facilitate Italy's energy transition objectives, ranging from lithium-ion batteries to hybrid solar ...
