

Evolving market dynamics in ERCOT and CAISO, the two leading US electricity markets for battery storage, call for smart optimisation strategies, write Ali Karimian and Alden Phinney of ...

The Record Discharge During the critical peak demand hours on the afternoon of July 9th, the Electric Reliability Council of Texas (ERCOT) reported a sustained discharge from battery ...

The robust performance of the large-scale battery energy storage systems in the Electric Reliability Council of Texas (ERCOT) grid came without shutdowns like the one that happened ...

Despite the uncertainty, some players remain optimistic. A recent financing deal secured over \$230 million for multiple new battery storage projects in Texas, signaling continued appetite for ...

A new GridBeyond report finds that succeeding in saturated markets requires software-led agility and real-time decision-making. Battery storage operators in Texas and California are facing a ...

A report from the Texas Reliability Entity shows that the ERCOT grid is increasingly reliable. And that's mostly because of solar and battery storage additions to the state's energy portfolio. ...

Focused on sustainability and innovation, esVolta develops, owns, and operates reliable utility-scale energy storage assets across the entire lifecycle - delivering value for utilities, energy users, and investors.

Existing battery projects in California and Texas see upside, while hybrid storage bets in the Midcontinent Independent System Operator (MISO) territory and the Southeast face shrinking margins under the revised tax credit rules.

A new white paper from GridBeyond is sounding the alarm for battery storage operators: The era of simple charge-low/discharge-high strategies is over--especially in competitive power ...

ERCOT CEO Pablo Vegas recently cited the growth in ERCOT's solar resources, coupled with its existing wind, and the recent rapid buildout of battery storage capacity as a significant contributor to the grid's growing reliability, even as ...

Battery Storage, Energy Tax Credits, and the New Law Battery storage in Texas towers above every other state. OBBB keeps standalone battery storage eligible for tax credits, but it limits ...

ERCOT warns that demand could exceed supply as soon as 2026 if current growth continues unchecked. Meeting this challenge will require a balanced energy portfolio, combining the reliability of natural gas and

other dispatchable ...

Energy Vault Holdings Inc. has successfully closed an \$18 million project financing deal for its 57 MW/114 MWh Cross Trails Battery Energy Storage System (BESS), now fully operational in ...

ERCOT, the organization managing the flow of electricity to 26 million Texans, is adding battery storage capacity at a record pace. In 2023 alone, installed capacity more than tripled. These ...

Just last August, ERCOT added 480 MW in battery storage projects to the grid, and these included Tesla's own BESS installed at its Gigafactory in Austin. Its Megapacks still use ...

In battery storage, alpha captures value added through intelligent asset management, real-time forecasting, multi-market bidding, and operational coordination, reflecting superior ...

During the critical peak demand hours on the afternoon of July 9th, the Electric Reliability Council of Texas (ERCOT) reported a sustained discharge from battery storage resources exceeding ...

And while ERCOT says the lights will stay on, they're banking on new solar and battery storage keeping pace. Why it matters to brokers: This reinforces why timing contracts around expected peak pricing periods is critical. Educate ...

Battery Energy Storage Systems Optimization and Sustainable Development Goals In 2023, ancillary services-focused approaches yielded solid returns in ERCOT, while basic charge ...

In this issue: Texas Reliability Entity: solar + storage helped avoid emergencies in 2024; warns "disorganized integration" of data center growth is "largest increased risk" to ERCOT PUC ...

The Cross Trails BESS Project is a 57 MW / 114 MWh battery energy storage system located in the ERCOT region of Texas and joins the likes of the 50 MW Byrd Ranch Storage Project. ...
