

Floating solar photovoltaic (PV) platforms have emerged as a promising solution to maximize the use of available water bodies for generating solar energy. These platforms offer several ...

The proposals will be introduced for Allocation Round 7 (AR7) with the window for applications open from 7 August until 27 August. Increased term length Fixed-bottom offshore wind, ...

The wind and waves present in the marine environment have been shown to exert a significant influence on the mechanical properties of floating structure. The load caused by wind can lead ...

Scaling up of solar and wind power is essential for Aotearoa New Zealand to become carbon neutral by 2050. While wind and solar currently account for less than 8% of New Zealand's total energy generation, by 2050 ...

Masdar, Sarawak Energy, and Gentari have joined forces to explore the feasibility of a large-scale floating solar energy project in Malaysia. The initiative, part of broader efforts to ...

The 10 MW floating solar array will be built on the Ipote?ti reservoir in Olt County, southern Romania. Hidroelectrica said it will be the largest floating solar installation on a reservoir in ...

The solar park, located in Qingdao (Shandong province), extends over 60,000 m² of waters connected to the ocean and has an installed capacity of 7.5 MW, which will generate around ...
