

The Fraunhofer Institute for Solar Energy Systems ISE in Freiburg, Germany is the largest solar research institute in Europe. With a staff of about 1 400, we are committed to promoting a sustainable, economic, secure and ...

Solar thermal can fulfill a substantial amount of heat demand in industrial and agricultural food processes within any given country and irrespective of the geographical location. In developed economies, solar ...

Solar and Storage Stabilized the Grid While thermal and nuclear plants faltered, solar energy and battery storage shone. June 2025 marked a record 45 TWh of solar generation in the EU, with ...

This article gives a clear account of alumina-based materials used in solar thermal energy systems. It covers solar thermal conversion, how high stability materials are important, and ...

Energy efficiency in gardening is becoming an increasingly important consideration as gardeners seek to optimize resources, reduce environmental impact, and enhance plant growth while ...

Les Îlots Blandin, Europe's largest floating solar farm in France, generates 74.3 MW of clean energy. This innovative solar plant uses water for cooling and offers a sustainable solution for ...

On June 20, 2025, the continent's biggest floating solar plant--the Les Îlots Blandin project--went into operation in Perthes, France. Built on what was previously a 127-hectare gravel quarry, ...

France has significantly boosted its solar energy capacity, adding 1,442 MW in the first quarter of 2025. This expansion brings the country's total installed solar capacity to 22.4 GW, as ...

The extraordinary heat waves that swept across Europe in June and early July brought with it the highest solar power production on record, which turned out to be useful because thermal ...

Jamie Gibbs Hot water accounts for around 11% of the average energy bill. So, if you're looking to lower your energy costs and improve your carbon footprint, it's worth considering solar water heating. Solar water heating ...

France solar thermal energy
