

Using a concurrent mixed-methods approach, this paper explored the political drivers of rural electricity demand in the Tolon District of Northern Ghana. Political visits and campaign periods...

For many rural residents, these scenarios are still pipe dreams because of unreliable internet access. While cities enjoy lightning-fast 5G networks and high-speed fiber, rural areas are ...

Microgrids offer a new approach to power generation and distribution, resulting in unprecedented flexibility and resilience. These localized electrical networks operate independently or in ...

Having carried out a rural microgrid feasibility study for the US Trade and Development Agency (USTDA) and the USAID-led Power Africa program last year, Atlanta, Georgia-based Renewvia Energy has commenced building ...

In this two-part series, Lily Carey reports on energy instability in rural Puerto Rico and its impact on residents with chronic medical conditions. Faced with limited government support, ...

Now, the convergence of modular battery technology, AI-driven management systems, and innovative financing is giving rise to a new model--villages can operate resilient microgrids ...

This research investigated the technical and economic viability of using hybrid PV and diesel generator systems for rural electrification in northern Ghana. The findings may guide ...

Abstract The CEL RURAL project has been conceived with the objective of promoting the implementation of renewable energy solutions in rural areas, with a view to enhancing the ...

Most rural electrification projects in Ghana are centred on grid extensions and diesel power plants (Adaramola et al., 2017). At the end of 2020, the country has four utility-scale grid-connected ...

Residential Microgrids and Rural Electrifications contains an overview of microgrids" architecture, load assessments, designing of microgrids for residential systems, and rural electrifications to ...

Abstract - Rural areas in developing countries are still refrained from continuous and uninterrupted power supply to power their household and run small industries. Thus, we can say that these ...

Ghana rural microgrids
