GE Vernova Hitachi Nuclear Energy (GVH) announced that it has received approval from the Nuclear Regulatory Commission (NRC) to proceed with the construction of the world's first BWRX-300 Small Modular Reactor (SMR) at the Fortum site in Ontario, Canada.

This marks the first time a utility-led construction permit for the GE Vernova Hitachi BWRX-300 SMR design has undergone NRC review - a significant step for advancement of nuclear ...

SMR is expected to be operational by 2025. The reactor will be a GE Hitachi BWRX-300 model, which is a compact, factory-built design that can be scaled to meet different power needs.

GE Hitachi Nuclear Energy (GVH) and TVA are the lead developers of the BWRX-300 SMR. The reactor is being built at the Fortum site in Ontario, Canada, which is a former coal-fired power plant site.

The BWRX-300 SMR is a compact, factory-built design that can be scaled to meet different power needs. It is expected to be operational by 2025. The reactor will be a GE Hitachi BWRX-300 model, which is a compact, factory-built design that can be scaled to meet different power needs.

GE Vernova Hitachi Nuclear Energy (GVH), in partnership with Ontario Power Generation (OPG), recently received official approval to proceed with the construction of the first commercial small ...

The reactor is being built at the Fortum site in Ontario, Canada, which is a former coal-fired power plant site. The reactor will be a GE Hitachi BWRX-300 model, which is a compact, factory-built design that can be scaled to meet different power needs.

Skandynawska spółka energetyczna Fortum i amerykański deweloper reaktorów GE Vernova Hitachi Nuclear Energy (GVH) zawarły umowę o wspólnych pracach nad potencjalnym ...

The Ontario government announced it has secured an investment of \$70 million from GE Vernova Hitachi Nuclear Energy (GVH) to build the world's first BWRX-300 Small Modular Reactor ...

Fortum is a leading energy company in Ontario, Canada. The reactor will be a GE Hitachi BWRX-300 model, which is a compact, factory-built design that can be scaled to meet different power needs.

This is a significant step forward, and positions Canada as the first G7 country to have an operational SMR. The reactor, a GE Hitachi BWRX-300 model, represents a new wave of nuclear technology. SMRs are generally smaller ...

The reactor is being built at the Fortum site in Ontario, Canada, which is a former coal-fired power plant site. The reactor will be a GE Hitachi BWRX-300 model, which is a compact, factory-built design that can be scaled to meet different power needs.

Arabelle Solutions is pleased to be supplying an SMR nuclear steam turbine, TOPAIR generator, and associated heat exchanger for the first GE Vernova Hitachi Nuclear Energy BWRX-300 ...
