Residential Solar Permit Reporting Program - SB 379 The Energy Commission's reporting hub for California cities and counties to annually provide data about online, ...

Through the first five record-setting solar and battery months of 2025, 11.5% of California's potential solar generation was curtailed to maintain grid balance. That's down from 13% over ...

As I'll explain here, this 22% difference in Peak Sun Hours will equate to a 22% difference in solar energy production. In solar energy applications, what truly counts isn't the hours between sunrise and sunset in a ...

For Californians seeking clean energy solutions and relief from rising electricity costs, the Self-Generation Incentive Program (SGIP) offers a compelling opportunity. Since its inception, SGIP has provided significant ...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is vastly in excess of the world's energy ...

Unlike non-renewable energy sources, solar power is infinitely renewable, environmentally friendly, and available in plenty across California's expansive territories. Beyond natural ...

California has long been at the forefront of clean energy initiatives, aiming to transition its electric grid entirely to renewable sources such as wind and solar power. The state has enacted laws ...

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms. With an industry-leading ...

Solar panels on multi-family units can significantly lower electricity costs for residents. While initial installation is an added expense, the long-term savings on energy bills are substantial. Solar ...

Transparent solar windows that capture ultraviolet and infrared light are now available in the US, enabling buildings to generate clean energy while maintaining aesthetic appeal.

AB 942 would be a gift to the state's three monopoly investor-owned utilities, whose profits are threatened by rooftop solar. Under net metering, rooftop solar owners can send surplus solar ...

These adverse state policy impacts exacerbated financing shifts, triggering plummeting demand and an 80% decrease in rooftop solar installation volume. The California Solar & Storage Association reports that the
