

Opus Titasz, a distribution system operator (DSO) in Hungary, has commissioned and put into operation four BESS projects. The four grid-connected battery energy storage system (BESS) ...

LevelTen Energy's Q2 2025 European PPA Price Index Report is now available for subscribers. Highlights of this quarter's report include: Solar Prices Down in Q2 P25 solar PPA prices on ...

To mitigate these challenges, Hungary is investing EUR150 million into approximately 50 grid-scale energy storage projects, aiming to add 440 MW of storage capacity by April 2026. These ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

Traditionally strong residential rooftop solar markets, like Italy, the Netherlands, Austria, Belgium, Czechia, and Hungary, are slowing. Households there are now postponing installations as the ...

Navigating today's energy transition demands more than innovation--it requires partners who blend scale, safety, and intelligence. With the global battery energy storage system company ...

In 1948, Maria Telkes built a solar-heated home that stayed warm in freezing winters using only sunlight and salt. Long before today's green tech, she proved clean energy was possible--and ...

It remains the largest operational single-site solar PV plant in the country. This integrated solar-plus-storage development aligns with Egypt's 2035 Integrated Sustainable Energy Strategy ...

SolarPower Europe's report adds that for solar to continue meeting EU targets, member states must improve the value of solar electricity within the system, citing energy storage flexibility ...

Recently, the German Federal Court of Justice (BGH) issued a landmark ruling confirming that local grid operators have the right to charge grid connection fees (BKZ) for energy storage ...

The longest, mostly cloudless days have arrived, and Hungary's domestic solar power capacity is now large enough to produce a significant amount of electricity. It may even be exported, but ...

One of Hungary's largest battery energy storage facilities has been completed in Szolnok. Built by Forest-Vill on behalf of MAVIR, the system officially began operations on June 26. The HUF ...

Hungary's Deepening Reliance on Russian Gas Hungary's Deepening Reliance on Russian Gas (image credits: wikimedia) Hungary stands out in the European Union for its enduring reliance ...

Solar takes top spot in the EU for the first month ever In June 2025, solar was the largest source of EU electricity for the first time, with multiple countries producing record amounts of solar power. Wind power in the EU started the summer ...

While this marks a significant achievement in renewable energy adoption, it has also led to grid imbalances, particularly during periods of peak solar production. To mitigate these challenges, ...

It further explained that the storage capacity of the battery facility is sufficient to supply the entire decorative and public lighting needs for the city of Budapest for four hours. The 40-megawatt ...

MAVIR, the Hungarian electricity transmission system operator (TSO), put into operation a battery energy storage system, BESS, of 20 MW in capability and a three-hour cycle. It will help grid ...

Global leading energy storage company, JinkoESS, a subsidiary corporation of Jinko Solar Co., Ltd., is proud to power a newly commissioned 3.8 MWh utility-scale energy storage system in ...

Four new grid-integrated energy storage systems have been commissioned in the service area of OPUS TIT&#193;SZ Zrt. The development, valued at nearly HUF 4 billion (EUR 10 million), was ...
