

ICAP is an open forum comprised of public authorities and governments that have established or are actively pursuing Emissions Trading Schemes (ETS) with an upper limit (cap) of greenhouse gas (GHG).

The law also introduces the concept of carbon units (quantified measurements of reduced emissions), giving legal rights to use and trade these units for climate-related projects. "As part ...

Greenhouse gas emissions resulting from human activity are causing the world's climate to change in ways that are dangerous to humans and the natural ecosystems we rely on. Strong and urgent action to reduce emissions ...

If previously the goal was to reduce emissions by 15% by 2030 compared to 1990 levels, now it is necessary to revise the goal in the direction of increasing ambition. We are now working on ...

Aydar Kazybayev, co-founder of the National Academy of Corporate Governance, has proposed the introduction of a carbon accounting system in Kazakhstan. He argues that such a system ...

While butane offers advantages in terms of reduced emissions during combustion, its overall environmental impact throughout the supply chain must be carefully evaluated. This includes addressing emissions from extraction, ...

Three-quarters of UK institutions reduced their carbon emissions last year as the total volume of CO₂ produced fell by the equivalent of flying around the world over 3,500 times. Figures from ...

Carbon offset programmes aim to lower emissions by allowing high-income countries to meet part of their reduction targets by financing projects in low- and middle-income countries. Evidence from China--one of the world's largest ...

The Indian government is working on modalities to mandate public procurement of green steel to reduce carbon emissions in the steel industry as part of its Green Steel Mission, estimated at ...

Kazakhstan reduced carbon emissions
