

Load growth and aging infrastructure require investment, but customer electricity prices are up 4.5% nationally, almost twice the 2.4% national inflation rate, according to the Bureau of Labor...

- Solutions like battery storage, cross-border interconnectors, and grid-forming inverters are critical to stabilize grids, backed by EU policies mandating 20-fold storage growth by 2030. - ...

The Barbados National Energy Policy (BNEP) 2019-2030 outlines Barbados' central vision regarding energy policy and planning and is designed to achieve the country's transformational goal of becoming a 100% renewable ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...

Conducted independent analysis on energy storage policy best practices, opportunities and barriers, including such topics as energy storage benefit-cost analysis, interconnection barriers, winter reliability benefits, ...

The U.S. electric power sector is experiencing a surge in renewable energy deployment, yet the grid faces mounting pressure from skyrocketing demand and shifting federal policies. As data ...

Despite its achievements in renewable energy, Spain faces challenges in fully transitioning from traditional energy sources. Balancing the intermittent nature of renewable energy with the need for consistent electricity ...

Among the notable changes are temporary electricity price reductions and explicit encouragement of energy storage deployment. While this framework offers long-term promise, its efficacy ...

Jharkhand, known for its rich natural resources, is now emerging as a significant player in India's solar energy journey. With increasing awareness about climate change, rising electricity costs, ...

The increasing integration of energy storage is transforming the operations of today's electricity markets. This review analyses the problems linked to the variability of renewable energy ...

The study highlights the sensitivity of BESS deployment to both tariff levels and technological learning rates, with higher tariffs exacerbating declining adoption. Despite these disruptions, global lithium-ion battery price trajectories ...

Latest independent energy storage electricity price policy

Our Energy Specialists look at the energy outlook for 2025. 14 July - Discounts on the purchase price of some EVs has been unveiled by the Department for Transport. The cost of some electric vehicles could be reduced ...

Latest PJM auction means another year of high electricity prices PJM, the regional grid operator, has shared the results of its most recent capacity auction, confirming that rate relief is at least two years away.
