

The growing frequency and severity of extreme events, both natural and human-induced, have heightened concerns about the resilience of power systems. Enhancing the resilience of power ...

The 2025 heatwave that scorched Europe from June to July was more than a climatic anomaly--it was a stress test for the continent's energy infrastructure. Temperatures exceeding 40°C ...

Rethinking energy security in a net-zero world As the world accelerates toward a cleaner energy future, ensuring energy security remains a complex challenge. A severe blackout in Spain and ...

Researchers have proposed various single and hybrid energy storage systems to enhance power system resilience. However, a comprehensive review of the latest trends in utilizing energy ...

Commerce and Industry Minister Piyush Goyal on Thursday (10 July) called on the energy storage sector to curb its reliance on imports from select countries and explore alternative supply ...

With 8 GW and counting, Texas is shaping the future of American grid resilience. The 550 MW of new battery storage now greenlit by Lydian Energy is not just another headline, it is the next ...

The increasing deployment of energy storage systems is significantly enhancing grid resilience by offering dependable backup during outages and facilitating the integration of renewable energy ...

The Council approved the latest revision of Portugal's national recovery and resilience plan (NRRP) in May 2025. The plan has a strong focus on the country's social, economic and environmental resilience, with measures ...

Envision recently completed a large-scale, CSA C800 witnessed burn test of its 5 MWh energy storage system, demonstrating robust thermal containment and adding to industry-wide safety ...

On this page, you can find energy storage related news from around the globe, our special print editions produced in partnership with Messe Düsseldorf, and videos from the energy storage Europe ...

SAN LEANDRO, Calif., July 24, 2025 /PRNewswire/ -- Inlyte Energy, a manufacturer of iron-sodium battery energy storage systems, will deploy a first-of-its-kind resilience-focused battery ...

Merlin and US data center company Edged Energy began construction last year on Portugal's first carbon-neutral data center campus in Vila Franca de Xira, about 20km from Lisbon. The ...

Lisbon energy storage for resilience

Moreover, the increasing use of neopentane in the development of advanced battery technologies holds promise for enhancing the resilience of energy storage systems. This has implications ...

In a time of upheaval and change in the energy sector, Battery Energy Storage Systems (BESS) are emerging as a critical piece of equipment to strengthen grid resilience. However, there are ...

The rapid development of wearable, portable, and foldable electronics has intensified the demand for flexible energy storage systems with high performance and mechanical resilience. Flexible ...

Lisbon's climate transition vision includes strengthening water-related resilience and adapting to extreme weather events, such as increasing water scarcity and more frequent heavy ...

Lisbon energy storage for resilience
