

Macquarie Asset Management has closed its Macquarie European Infrastructure Debt Fund (MEID) with EUR1.2 billion (US\$1.4 billion) raised. An additional EUR2.3 billion (US\$2.67 billion) was ...

Solar-powered microgrids offer a range of benefits and challenges, some of which are discussed below:  
Sustainability: One of the main benefits of solar-powered microgrids is that they rely on renewable energy, making them ...

As an overview, one-third of Slovenia's energy comes from hydroelectric sources, with the other two-thirds coming from renewable energy in Slovenia that encourages a lowering of greenhouse gas emissions. Utilizing the power of ...

However, ongoing technological advancements, government support through policies and funding initiatives, and increasing awareness of the benefits of microgrid energy storage are expected ...

Several papers have recently confirmed the benefits derived from the application of RO in scheduling microgrid-based flexibility sources [10], [11]. In particular, a robust optimization ...

The Impact on Sustainable Development Basic construction of microgrid: The project has initially established an enterprise microgrid system, laying a solid foundation for achieving zero carbon ...

China has begun building a submerged data centre off the coast of Shanghai, aiming to reduce electricity consumption and environmental impact by using seawater for cooling and offshore ...

The Resilient Minneapolis Project (RMP) is a collaborative effort between the City of Minneapolis and local utilities to enhance service in low-income communities by implementing microgrid ...

xAI, an AI startup owned by Elon Musk, is reportedly in talks with financier Valor Equity Partners to secure up to US\$12 billion in funding for its expansion, according to the Wall Street Journal on ...

July 21 (SeeNews) - Slovenia's government said on Monday it will allocate a total of 51.2 million euro (\$59.7 million) in co-financing for the construction and upgrade of district heating and ...

This enhanced value makes microgrid investments more attractive to stakeholders, as the combined benefits of reliability and grid services can justify the initial capital expenditure. As ...

As power challenges impact Europe's AI data centre hotspots, adopting microgrid independent power can be a cleaner, greener and cheaper alternative to traditional grid connections, writes ...

Power Conversion System (PCS) serves as the "engine" of the energy transition, offering real/reactive power regulation, grid-connected/off-grid switching, and energy storage integration.

APAC data centre platform Princeton Digital Group (PDG) has signed a definitive agreement with New York-based alternative investment firm Stonepeak for a US\$1.3 billion preferred equity ...

CityFibre has secured a €2.3 billion (US\$3 billion) financing package to accelerate the expansion of its nationwide full fibre network, following agreements with shareholders and lenders.

As part of its decarbonization and energy efficiency efforts, Slovenia launched a EUR 51.2 million cofunding package for companies and cooperatives. The program covers the construction or ...

Malaysia will introduce a data centre framework in October aimed at streamlining policies and guiding the development of the sector, according to the country's trade and digital ministries.
