

Professor Suman Rath, Incoming Assistant Professor at The University of Tulsa, is seeking two highly motivated PhD students to join his research group starting in Fall 2025 or Spring 2026. ...

A Data Center is an entire unit including a server room that ensures the continuous operation of servers and their ongoing maintenance. Class-leading data center power solutions will keep your operations running 24/7. They're ...

Redwood Materials is repurposing old EV batteries into energy storage systems that cost "substantially less" than brand new storage projects, the company said Thursday. The electric ...

This talk will provide an overview of Canadian provincial and remote community power grids, and a detailed discussion of Ontario's provincial grid, market, and future expansion plans, in the ...

Instead of delivering electricity over long distances, microgrids are a different way to distribute energy just where it's needed. And as its name suggests, a microgrid provides a smaller amount of power to a smaller local ...

Nowadays, DC microgrids are prevalent around the world, whose stability analysis is crucial for their stable operations. The small-signal stability analysis of DC microgrids now is reasonably ...

In the interconnection and optimized operation of the classical hybrid AC/DC microgrids (HMG), the conventional line-frequency transformer cannot block grid faults and comprehensively ...

Benefits of Microgrids Microgrids can help maintain power for customers regardless of disturbances or outages on the centralized grid, improving reliability. By enabling local sources to work together, a microgrid ...

The arc current is essential for arc fault detection in power generation systems such as residential direct current (DC) microgrids and rooftop photovoltaic (PV) systems. However, the DC arc is ...

This strategy first constructs an integrated underfrequency load shedding model for islanded microgrids on the basis of multiclass load-related factors such as the load frequency regulation ...

A critical overview of the decarbonization status and policies for energy systems in Canada will be also presented, focusing on zero-emission power grid, EV, and Hydrogen plans and strategies ...
