

As Montenegro prepares to hold its first renewable energy auction, the country is taking a major step toward becoming a regional leader in solar power. The auction's focus on solar PV ...

Montenegro's Ministry of Energy and Mining has launched the country's first renewable energy auction, targeting 250 MW of solar power generation, it was announced today.

The program sets clear targets for 2030, 2040, and 2050, includes an action plan, and provides a framework for regulatory, infrastructural, and market development. Green hydrogen produces ...

Researchers at the Fraunhofer Institute for Solar Energy Systems ISE have succeeded in developing solar cells based on III-V semiconductors that can achieve an efficiency of over 40 ...

The chapter mainly introduces the development background and international development status of SSP. Energy crisis and global climate change are major issues that affect global sustainable ...

New York, July 2 - A new study published today shows that coupling renewable energy targets with supportive development policies and investments would have major financial benefits. ...

Pljevlja Coalmine, a fully owned subsidiary of Montenegro's state power utility EPCG, is making a major move into renewable energy with plans to develop a large-scale solar power plant in the ...

Jo?i? stressed that EPCG - Solar Gradnja is becoming increasingly stable and efficient each year and that political motives drive attempts to discredit it. She concluded by highlighting the ...

SLSEA - Sri Lanka Sustainable Energy Authority As the governing body responsible for pioneering the sustainable energy revolution in Sri Lanka, we aim to facilitate the development of our nation's rich energy resources, ...

Montenegro has set a ceiling price of EUR65 (\$76.11)/MWh for its first solar auction, which will offer 12-year contracts for difference (CfD) for up to 250 MW of capacity. The auction is scheduled...

The global charge controller system market is experiencing robust growth, driven by the increasing adoption of renewable energy sources, particularly solar power. The market's expansion is fueled by the need for efficient energy management ...

The largest subsidies went to the two wind farms, which produce the most electricity. In August last year, a
