

Offshore wind substation storage

Fugro and TGS have been awarded contracts for detailed site investigations at the Sørlege Nordsjø II (Southern North Sea II) site, where Norway's first commercial offshore wind farm will ...

TGS has completed an ultra-high-resolution 3D (UHR3D) seismic survey for the Green Volt floating offshore wind farm in Scotland, developed by a consortium of Flotation Energy and ...

The Maltese government has received three submissions in the pre-qualification period for the country's first offshore wind tender, which will award a concession for a floating wind project with an installed capacity of around 300 MW.

Winning POWER's highest honor, South Fork Wind--the first commercial-scale offshore wind farm in U.S. federal waters--stands as a beacon for the power sector's ambition to forge new ...

Danish police have launched an investigation following an incident at the construction site of the onshore substation for the 1-gigawatt Thor offshore wind farm, currently under development in ...

The offshore substation for the 1 GW Thor offshore wind farm has left HSM Offshore Energy's Schiedam yard in the Netherlands and is on its way to the project site in the Danish North Sea. ...

The new cable-laying vessel (CLV) that joined Prysmian's fleet earlier this year, Monna Lisa, has begun installing its first submarine cable at the Coastal Virginia Offshore Wind (CVOW) project ...

The offshore substation topside for the Taipower Offshore Wind Project Phase II (TPC Phase II) has been completed in Vietnam and is now on its way to Taiwan. Source: Shinfox Far East ...

The final electrical substation for Dogger Bank C has been floated out to sea for installation, marking a major milestone in ABB 's electrical infrastructure delivery for the world's largest ...

The 1.1 GW Thor offshore wind project off the coast of Jutland, Denmark, has reached two major construction milestones. The high-voltage offshore substation has been delivered, and 36 out ...

The offshore export cable route runs from the wind farm area to a landfall point near Kirby Brook, Essex. From there, onshore export cables will transport the renewable energy approximately 24 kilometres west to the proposed onshore ...

Today (23), Ørsted announced that the first turbine from the 920 MW Greater Changhua 2b and 4 offshore wind farms has successfully delivered first power to the national grid of Taiwan. This marks a major

milestone on the path to ...

ORLEN is committed to maximising Polish industry participation across the entire 30-year lifecycle of the Baltic Power wind farm. Key components, including turbine nacelles, subsea cables, offshore substation ...

HSM Offshore Energy has completed and dispatched the offshore substation for the 1.1-gigawatt (GW) Thor wind farm, Denmark's largest offshore wind project to date, the company said on ...

The completion of ABB's substation scope is a testament to meticulous planning, advanced engineering, and the dedication of the teams involved. It signifies a critical step forward in the ...

The significant contributions of this paper are described below: This paper proposes a functional model of offshore islands considering hydrogen production from offshore wind power.

The final electrical substation for Dogger Bank C has been floated out to sea for installation, marking a major milestone in ABB's electrical infrastructure delivery for the world's largest ...

The final electrical substation for the ambitious Dogger Bank C project has been floated out to sea for installation. This marks a key step towards full commercial operation in what will be the world's largest offshore wind cluster, boasting ...

The project includes two substations--one offshore and one onshore--to connect the wind farm to Denmark's electrical grid. HSM Offshore Energy is handling the engineering, procurement, ...
