

Bangladesh set up its first hydrogen energy laboratory with a small hydrogen production plant in Chittagong, a port city on the south-eastern coast of Bangladesh. The plant was inaugurated by the Bangladesh Council for ...

Job at Panama City, United Nations Environment Programme jobs. Hydrogen Specialist consultant for the Plurinational State of Bolivia - Advancing a Regional Approach to the Green ...

This paper proposes a two-layer, multi-step optimal sizing framework for electric-hydrogen energy storage to address multi-scale energy storage requirements. The first step, the optimal sizing ...

This premier battery conference kicks off with a high-level plenary featuring opening ceremonies, keynote speeches, and executive dialogues. Along with the Leaders Closed-door Roundtable, these sessions will bring together ...

Electrochemical Storage NREL's electrochemical storage research ranges from materials discovery and development to advanced electrode design, cell evaluation, system design and development, engendering analysis, and ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems with a 90-billion-baht investment. This effort aims to stabilize the clean energy supply, ...

Now, researchers report the discovery of a cheap catalyst that adds hydrogen atoms to oil-like molecules that are liquid at ambient temperature and pressure. That means hydrogen could be ...

Scientists have created a graphene-encased catalyst that reduces platinum use by 99% while maintaining high efficiency in hydrogen production, making green hydrogen technology more ...

This CEG report contains new analysis evaluating the feasibility of hydrogen power plants as long-duration energy storage resources, based on cost competitiveness as well as equity and ...

Australian Gas Light Co. (AGL) has purchased 100% of a public housing virtual power plant (VPP) in South Australia from Tesla, with plans to integrate it with its VPP network on the east coast.

A breakthrough in clean energy could unlock affordable, industrial-scale green hydrogen. For the first time, scientists have determined how to scale up decoupled water electrolysis, a technique that produces green hydrogen ...
