

Battery Electric Vehicles (BEVs) and Hybrid Electric Vehicles (HEVs) share some components, but not all: Auxiliary battery: Both BEVs and HEVs use an auxiliary 12V battery for low-voltage systems (lights, infotainment, etc.).

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

This report is a life-cycle assessment (LCA) of the global warming potential of passenger cars sold in the European Union (EU). It compares sales-weighted average medium segment gasoline, diesel, and natural gas internal ...

Imports of battery electric vehicles (BEVS) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

For most fleet operators, limited vehicle availability and high upfront costs are some of the biggest roadblocks to electrification. Despite improving total cost of ownership (TCO) for battery ...

Battery Electric Vehicles (BEVs) now dominate powertrain installations, making up nearly 71% of the total demand across major regions. Battery packs account for about 38% of the market ...

Battery electric vehicles (BEVs) in Europe are now proving to be significantly more climate-friendly than petrol-powered cars, according to new findings from the International Council on Clean ...

"The good news is a hydrogen vehicle is an electric vehicle," says Guldner. "It's just a different way of storing the energy versus a battery, which also means that we can reuse a lot of the ...

A consortium is seeking an Original Equipment Manufacturer (OEM) as a partner that can cover all vehicle-related activities in a Horizon Europe project focusing on the design and integration ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

Battery Electric Vehicle (BEV) A BEV runs entirely on electricity. Unlike traditional cars, BEVs don't have a

Podgorica battery electric vehicles bevs

gasoline engine; they get all their power from a rechargeable battery. This means ...

Guidance for car manufacturers on how to apply for their vehicles to be eligible for the Electric Car Grant. The guidance explains: how the scheme works vehicle eligibility the application process ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

Hydrogen fuel cell cars (FCEVs) have been on the market for a similar duration to the current wave of battery EVs (BEVs). But they have sold a tiny fraction in comparison. In 2024, 12,866 ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...

The global electric vehicle (EV) market is witnessing a significant resurgence, with sales in the first half of the year exceeding 5.9 million battery electric vehicles (BEVs), according to a ...

These components are specifically designed for automotive batteries used in battery electric vehicles (BEVs) and plug-in hybrid vehicles (PHEVs), with the expansion finalized as of June ...

In 2025, BEVs are expected to account for more than 15%-25% of all new car sales globally, with some markets seeing even higher penetration. Unlike plug-in hybrids, BEVs run exclusively on ...

The objective of the present study is to assess the global warming potential (GWP) of battery electric cars (hereafter referred to as BEVs) in the top 10 electric vehicle-selling developing ...
