

Improving energy efficiency in the building sector is critical for achieving affordable and clean energy (SDG 7) and taking climate action (SDG 13). Serbia, as an EU candidate, must align ...

Key topics will include decarbonising the energy system, advancing renewable energy, and ensuring energy security, with a particular emphasis on offshore wind, energy storage, and the future electricity grid.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...

The MoU covers the development of battery energy storage systems (BESS) and renewable energy projects, including solar and hybrid solutions, to strengthen the state's energy security ...

It paves the way for the joint development of battery storage and renewable energy facilities aimed at enhancing the state's energy resilience and aligning with national sustainability goals.

Serbian state-owned power utility Elektroprivreda Srbije, EPS, connected its first larger photovoltaic unit to the grid. The new solar power plant is called Petka and it has a 10 MW grid ...

Renewable energy has a constantly increasing role in modern infrastructure. Distributed systems allow for lower transmission losses and in situ generation. However, integrating renewable ...

Renewable energy storage compatibility stands as a cornerstone for the efficient integration of diverse energy storage technologies with renewable sources such as solar and wind. This ...

ZEBs must feature extremely high energy performance, produce zero on-site carbon emissions from fossil fuels, and ensure that any remaining energy demand is met exclusively through ...

Executive Summary The city of Belgrade faces significant, long-standing challenges that impede its alignment with the United Nations Sustainable Development Goals (SDGs), particularly ...

Management experience in the electric and/or utility industry, government energy policy and regulations, energy and/or water project financing, district heating, renewable energy and gas ...

India added a record 22 gigawatts (GW) of renewable energy capacity in the first half of 2025, marking a 57 per cent increase from the 14.2 GW installed in the same period last year, ...

Renewable energy storage belgrade

The United Nations reports a global shift toward renewable energy, calling it a "positive tipping point." Tuesday's U.N. reports reveal that 92.5% of new electricity capacity in 2022 came from ...

This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis. There are several energy storage technologies available, broadly - ...

Construction also began on the luxury Delta District residential and business complex in Belgrade, which will be certified with prestigious LEED and WELL standards. At the same time, Delta Iron is being developed in Novi Sad - a ...

The year 2024 was a milestone in the global energy transition. Renewable energy didn't just make gains, it shattered records and established itself as the undisputed economic powerhouse of ...
