

Renewables as a Path to Stability Guterres emphasised that renewable energy brings more than environmental benefits; it strengthens energy security. Unlike fossil fuels, which are vulnerable ...

Nuclear is not renewable (because it relies on uranium, a finite resource not easily replenished) and is not a fossil fuel. According to the Nuclear Energy Institute, nuclear is an "energy source that has zero emissions, ...

The One Big Beautiful Bill Act gives the oil, gas and coal industries historic access to federal lands while ending key tax credits for solar and wind. President Donald Trump has been openly ...

In 2024, solar photovoltaics (PV) were, on average, 41% cheaper than the lowest-cost fossil fuel alternatives, while onshore wind projects were 53% cheaper. Onshore wind remained the most ...

A new report from the International Renewable Energy Agency (IRENA) finds 91 percent of new renewables in 2023 were cheaper than fossil fuel power, but warns of mounting financing and ...

Suppliers of fossil fuels used for heat, notably in industry, will soon be obliged to demonstrate a proportion of energy they supply is from a renewable source, following Government approval ...

The addition of 582 gigawatts of renewable capacity in 2024 led to significant cost savings, avoiding fossil fuel use valued at about USD 57 billion. Notably, 91% of new renewable power ...

The majority of newly commissioned renewable energy is more cost-effective for electricity generation than most fossil fuels worldwide, a report by the International Renewable Energy Agency (IRENA ...

Biogas, naturally occurring gas that is generated by the breakdown of organic matter by anaerobic bacteria and is used in energy production. Biogas is a renewable energy source and can be produced from organic wastes in ...

According to Guterres, renewables almost match fossil fuels in installed global power capacity. Last year, nearly all new power capacity additions came from renewables, with every continent ...

Renewable energy hits global tipping point for even lower costs, UN says UN chief Antonio Guterres says "the fossil fuel age is flailing and failing" as renewable energy becomes cheaper.

This growth is primarily attributed to the rising adoption of biodiesel as a renewable fuel source, which has led to an oversupply of crude glycerol. The conversion of this surplus glycerol into ...

Renewable source fuel

The figure shows Australian electricity generation fuel mix in shares from 1997-98 to 2022-23 and calendar year 2023. Fossil fuels contributed 65% of total electricity generation in 2023, including coal (46%), gas (17%) and oil ...

The addition of 582 gigawatts of renewable capacity in 2024 led to significant cost savings, avoiding fossil fuel use valued at about USD 57 billion. Notably, 91% of new renewable power projects commissioned last year were more cost ...

Minister for Climate, Energy and the Environment Darragh O'Brien has secured government support for the introduction of the Renewable Heat Obligation Scheme (RHO), and approval to ...

The United Nations reports a global shift toward renewable energy, calling it a "positive tipping point." Tuesday's U.N. reports reveal that 92.5% of new electricity capacity in 2022 came from ...

Even more impressive: 91% of all new renewable power projects built in 2024 were cheaper than any new fossil fuel option. Technological innovation, strong supply chains, and economies of ...
