

GHGSat is a commercial satellite constellation, providing high-resolution measurements of methane (CH₄) and carbon dioxide (CO₂) to detect and quantify emissions from individual industrial sites. The first satellite, Iris ...

A Long March-2D rocket launched the first batch of the Three-Body Computing Constellation from the Jiuquan Satellite Launch Center in northwest China. The constellation is designed to "host ...

The expansion is part of a wider global program to build out additional tracking antennas to support both its existing constellation and the infrastructure necessary to support its third-generation C-3 mobile satellite system. ...

Satellite constellation: A design hurdle The Space Act defines a constellation as a group of space objects consisting of at least 10 operational spacecraft, but not more than 99, working together ...

Marking a significant milestone in the rollout of its next-generation Earth observation system, EarthDaily Analytics has successfully launched and made initial contact with the first satellite of its EarthDaily constellation. Telemetry ...

NarSha is a microsatellite constellation for methane monitoring, aiming to provide real-time satellite monitoring services for cities worldwide, specifically targeting detection of sources of ...

Sierra Space's \$45M power station can build a solar panel a day and a satellite wing a week Sierra Space's Power Station will produce low-cost, scalable power systems ranging from 10 ...

This makes it well-suited for launches involving multiple stacked satellites and enables internet satellite constellations to maintain their orbits for longer durations, effectively extending ...

The aerospace and geospatial technology sectors are undergoing a transformative shift, driven by the convergence of artificial intelligence, laser communication, and next-generation satellite ...

The satellites use software-defined, digitally formed beams to meet evolving communication needs and are built with technologies adapted from U.S. military satellite programs. Each ...

A general satellite channel model is proposed for communications between a rapidly moving low Earth orbit (LEO) satellite in a mega-constellation and a stationary user on Earth. The channel ...

Through the Lz transformation based on three-parameter interval grey numbers, the proposed dynamic

Satellite constellation power

reliability assessment model for multi-state communication satellites effectively ...

JACKSONVILLE, Florida. Redwire was selected by Earth observation company DeepSat to provide digital engineering services in support of a planned satellite constellation operating in ...

With options for two additional satellites, this delivery will support Initial Operational Capability and is the first step in a phased approach to rapidly proliferate a diverse satellite constellation.

The O3b mPOWER constellation entered commercial service in April 2024 and provides coverage to nearly 95% of the world's population. The constellation's architecture allows each additional satellite beyond the first six to ...

India's depleted and near-defunct fleet of NAVIC satellites requires urgent replacement since they serve India's strategic forces and play a major role in augmenting warfighting capabilities. The ...

As Pixxel scales its hyperspectral satellite constellation, Dhruva Space steps in with reliable, high-performance Space Power Systems technology, made in India. BENGALURU, INDIA, July 7, ...

With these two satellites, the O3b mPOWER constellation continues to set the standard for global connectivity
Cape Canaveral, 22 July 2025 - The latest pair of O3b mPOWER satellites was ...

A Long March 3B rocket carrying a test satellite, Shijian 25, blasts off from the Xichang Satellite Launch Center in Southwest China's Sichuan province, Jan 7, 2025. [Photo/Xinhua] BEIJING -- China is set to embark on a series of ...

Orbital Infrastructure: The New Frontier of Power The strategic value of orbital infrastructure--satellite constellations, space stations, and navigation networks--cannot be ...

Two Boeing-Built O3b mPOWER Satellites Successfully Launch, Enhancing SES Constellation - Satellite pair is healthy and continuing journey to Medium Earth Orbit (MEO) to join first eight ...

Tanager: Cutting-Edge Hyperspectral from Orbit If you aren't familiar with Planet's Tanager mission, it's our visible to shortwave infrared (VSWIR) hyperspectral constellation. Tanager-1 ...

Toulouse, France, 26 July 2025 - The four Airbus-built CO3D (Constellation Optique 3D) satellites have been successfully placed into orbit by an Arianespace Vega-C rocket from the European ...
