

The aim of this work is to study the effects of utilizing cleaner technologies in district heating networks and assess their contribution to the energy transition within densely ...

In the current study, we investigated the effects of adding castor shell powder and carbonized castor shell powder as a thermal storage material in a conventional solar distiller (SD) basin on ...

With its updated National Energy Independence Strategy, Lithuania has outlined its intention to move towards an electrified energy system and support new industrial development based on ...

Construction has officially commenced on the Santa Teresa solar and storage facility, a significant renewable energy facility in Do#241;a Ana County, New Mexico. Developed by DESRI (D. E. Shaw ...

Lithuania has nearly doubled its electricity generation from renewable sources between 2022 and 2024. The policy shifts have led to a rise in residential solar photovoltaic (PV) installations and ...

Many types and designs of solar photovoltaic cells that harness solar energy, yet their efficiency diminishes greatly with an increase in operating temperature. The study aims to investigate the ...

Modern desalination plants rely heavily on reverse osmosis, a process improved by membrane technology and energy recovery systems to reduce costs and environmental footprint. Emerging innovations also include hybrid desalination ...

This article gives a clear account of alumina-based materials used in solar thermal energy systems. It covers solar thermal conversion, how high stability materials are important, and ...

Jamie Gibbs Hot water accounts for around 11% of the average energy bill. So, if you're looking to lower your energy costs and improve your carbon footprint, it's worth considering solar water heating. Solar water heating ...

As the demand for solar energy continues to grow, further advancements and refinements in passive cooling technologies will be crucial. The future holds promise for new materials and ...

The Ministers of Energy and the Environment in Lithuania have approved an additional EUR37 million (US\$43 million) for an energy storage capex grant scheme, while Trina Storage has secured ...

VILNIUS - A solar park in the village of Meiluskiai in Lithuania's northeastern district of Anyksciai, operated by Danish renewable energy company European Energy, has joined the Lithuanian ...

Lithuania is targeting 100% renewable energy consumption by 2028, with intermittent generation from solar and wind driving the need for large-scale energy storage. This is particularly the ...

Solar thermal can fulfill a substantial amount of heat demand in industrial and agricultural food processes within any given country and irrespective of the geographical location. In developed economies, solar ...

UK-based Tullow Oil has acquired an extension of 6 months to submit Kenya's oil development plan in Turkana. The subtle setback postpones the country's hopes of benefitting from its oil ...
