

Lucknow: The Institute of Engineering and Technology (IET) is now home to two cutting-edge centres of excellence focused on green hydrogen and electric vehicles. The institution has ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

Singapore pressing ahead with R& D on emerging energy options, including hydrogen, geothermal With regional interest in nuclear energy rising, Singapore must build capabilities too: Tan See ...

Hydrogen storage used to be one of those niche industrial topics only a few insiders really paid attention to. But not anymore. Today, it's becoming a powerhouse in the global clean energy ...

Hydrogen storage is emerging as a long-duration solution for renewable energy systems, offering grid stability despite lower efficiency and higher costs. The Oxford Institute for Energy Studies ...

The One Big Beautiful Bill Act reshapes clean energy incentives--phasing out certain tax credits, adjusting domestic content rules, and limiting eligibility for projects tied to foreign entities. ...

Hydrogen is a promising clean and renewable energy source; however, its efficient storage is one of the key challenges of establishing the sustainable hydrogen economy. The light main group ...

Following its approval by Congress, the One Big Beautiful Bill Act was signed by President Donald Trump on July 4, 2025. This Holland & Knight alert summarizes certain key proposals in the ...

So-called liquid organic hydrogen carriers (LOHCs) offer a solution to the storage and transport problem. But inserting and extracting hydrogen into LOHCs requires catalysts that are often ...

METASPACEX, a leading energy sector company, has announced a strategic partnership with Chongqing Bihe New Energy Technology Co., Ltd. (Chongqing Bihe) to enter the hydrogen ...

Now, researchers report the discovery of a cheap catalyst that adds hydrogen atoms to oil-like molecules that are liquid at ambient temperature and pressure. That means hydrogen could be ...

This paper proposes a two-layer, multi-step optimal sizing framework for electric-hydrogen energy storage to address multi-scale energy storage requirements. The first step, the optimal sizing ...

Tehran hydrogen energy storage

Abstract As the incremental deficiency of Li resources, it is significant and instant to supersede Li with other earth-abundant elements for electrochemical energy storage devices. While lithium ...

This CEG report contains new analysis evaluating the feasibility of hydrogen power plants as long-duration energy storage resources, based on cost competitiveness as well as equity and ...

BESafe New BESafe device offers pre-calibrated smart sensors, dual-gas detection, and compact installation footprint to support evolving energy infrastructure needs. As battery storage ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...

The new liquid contains up to 6.9% hydrogen by weight, surpassing the hydrogen storage goals set by the U.S. Department of Energy for 2025. This discovery marks the beginning of a new ...

Hydrogen storage technologies are mainly divided into compressed hydrogen storage, liquefied hydrogen storage, cryo-compressed hydrogen storage, metal hydrides hydrogen storage, ...

Selecting the right hydrogen storage method involves a careful consideration of various factors, including application requirements, infrastructure availability, cost, and safety. Compressed ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (H.R. 1 119th Congress) (OBBBA), which significantly changes the clean energy tax credit landscape established by the Biden administration pursuant to the ...

Hydrogen: dubai aims to become a major producer and exporter of hydrogen.Shell's expertise in hydrogen production, transportation, and storage will be crucial.This includes exploring both ...

Green Hydrogen, Energy Storage & Solar: The Future of Energy Is Collaborative and Digital We need to discuss the importance of collaboration, innovation, and digitalization in driving a ...

Tehran hydrogen energy storage
