

Electric Vehicle Test Equipment Market Size & Share Analysis - Growth Trends & Forecasts (2025 - 2030)

The Electric Vehicle Test Equipment Market Report is Segmented by Vehicle Type (Passenger Cars and ...

The extended range multi-mode electric vehicle (ERM-EV) market is poised for significant growth, driven by increasing consumer demand for vehicles offering longer ranges and greater ...

Market segmentation reveals a strong preference for Battery Electric Vehicles (BEVs) over Plug-in Hybrid Electric Vehicles (PHEVs) and Fuel Cell Electric Vehicles (FCEVs), with BEVs capturing the largest market share.

This paper explores the implementation of battery electric vehicles (BEVs) in underground mining operations, focusing on their benefits, challenges, and safety considerations. The study ...

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

In the first half of the year, more than 5.9 million battery electric vehicles (BEVs) were registered worldwide, a 37% increase compared to the same period in 2024. For comparison, full-year sales in 2024 had only grown by around 14%. China ...

The decarbonization of transport is crucial for meeting global climate goals, and FCEVs offer promising advantages over traditional battery electric vehicles (BEVs), including:

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

Furthermore, the ongoing competition with battery electric vehicles (BEVs) and their established charging infrastructure necessitates focused efforts on enhancing fuel cell technology's ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

The company has faced recruitment challenges, particularly in attracting experienced local executives and dealership partners. Its initial focus on battery-electric vehicles (BEVs) without ...

As part of its ongoing mobility partnership with Ayvens Turkey, AstraZeneca Turkey is set to replace 169 additional vehicles in its fleet with electric models, aligning with the company's ...

# Turkey battery electric vehicles bevs

The market share of pure electric vehicles in the first half of 2025 was 15.6%, still far from the level required for the transformation phase. Meanwhile, the total market share of gasoline and ...

The factory in Szeged, southern Hungary, is designed for an initial annual capacity of 150,000 vehicles, with plans to expand to 300,000 vehicles. BYD chose the location not only due to its ...

Tesla TSLA and BYD BYDDF are the world's largest electric-vehicle makers. But BYD has raced far past its U.S. rival, including in all-battery electric vehicles (BEVs). Tesla reported another ...

Turkish President Recep Tayyip Erdogan sat behind the wheel of a new electric sedan produced by local company Togg, in a new effort to promote electric vehicles, whose record sales have ...

In 2025, Turkey's revised Special Consumption Tax (&#214;TV) for vehicles has become a seismic shift in the automotive and renewable energy sectors, reshaping consumer behavior, accelerating electric vehicle (EV) adoption, and ...

China's BYD said on Tuesday it delivered 382,585 vehicles globally in June, marking a 10.5% increase from the same month last year. Of the total, 377,628 were passenger vehicles, ...

The forecast period (2025-2033) anticipates significant market expansion across various segments, including battery electric vehicles (BEVs), plug-in hybrid electric vehicles (PHEVs), ...
