

The energy storage flywheel market, currently valued at \$236 million in 2025, is projected to experience robust growth, driven by the increasing demand for reliable and efficient energy ...

The country expects to achieve fully market-oriented development of the power storage industry and independent research and development of core technologies and equipment by 2030. Answering the call, local governments ...

To ensure the quality and comprehensiveness of energy storage data statistics, and to objectively analyze the development status of the energy storage industry for the year and forecast future trends, CNESA regularly ...

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

The government of Victoria in Australia is fuelling its cleaner energy efforts as it accelerates the development of Global Power Generation's battery energy storage system (BESS) project in ...

The Victoria Energy Policy Centre (VEPC) is a research centre focussing on policy challenges in energy in Victoria and Australia. We combine research and analysis with a practical understanding of government processes.

The Low-carbon and Smart-energy Innovation Park Solutions market is experiencing robust growth, driven by increasing global awareness of climate change and the urgent need for ...

ZEVs could also potentially provide new, mobile forms of energy storage. Victoria's goal is a fully decarbonised road transport sector by 2045. This will bring enormous benefits for Victoria beyond emissions reduction, including ...

Banpu Public Company Limited, through its wholly owned subsidiary Banpu Energy Australia Pty Limited (BEN), has announced a joint investment with EnergyAustralia in the development of ...

The exploration of phenolphthalein's role in energy dissipative systems is in its early stages, with a growing market potential as energy efficiency becomes increasingly crucial. The technology is still emerging, with varying levels of ...

The Koorangie BESS (pictured) features 100 Tesla Megapack units equipped with grid-forming inverters. Image: Edify Energy. Australian renewable energy developer Edify Energy has confirmed that its

185MW/370MWh Koorangie ...

The AU\$400,000 per-project funding cap under Victoria's Neighbourhood Battery Initiative aims to incentivize multi-functional C& I ESS deployments that combine battery storage with solar PV ...

This trend is further amplified by the growing adoption of energy storage systems (ESS) for grid stabilization and renewable energy integration. The market is witnessing significant ...
